Introduction : M/s GEOCON (India) & ASSOCIATES,

We would like to introduce ourselves as one of the upcoming and specialized Geotechnical & Piling firm based in New Delhi. We are delivering the following type of services throughout India using both traditional and high-tech methods:

- Board cast-in-situ Reinforced Concrete Piles of diameter 250mm to 1200mm
- Under-reamed Piles of diameters up to 600mm
- Stone Columns and Load Testing
- All types of Pile Testing including Integrity Testing
- Plate Load Test for Bearing Capacity of Soil
- Deflection Test for Railways & Highway Bridges
- Soil Investigation Works in ordinary as well as in Rock strata
- De-Watering System for decreasing the water level

With a dedicated team of highly skilled and trained workforce the company is also equipped with new efficient and environmental friendly pile driving equipment.

The company always ensures rapid response, efficient estimates and quick turnaround for both new as well as for rehabilitation of old works. The company is always guided and audited by a Chartered Engineer.

Being a professionally managed organization, we are committed to the highest standards as well as quality of works as well as staff training including maintaining safety at site and laboratory works.

GIA is one of the upcoming and highly professional geotechnical companies in providing cost effective quality service to clients/contractors with specific attention on Health and Safety of its staff with providing training packages for all workers associated with piling and soil investigation contracts.

Given the opportunity, the company strives to undertake all the works with honesty, professionalism, dedication with a commitment for quality and reliability in all the projects from inception to final report stage.
